Professional Summary

Frontend Developer with 4+ years of experience building scalable and responsive enterprise web applications using React, Next.js, TypeScript, JavaScript, HTML, and CSS. Strong experience developing reusable UI components, complex forms, dashboards, document workflows, state-driven applications, and responsive interfaces. Experienced in Next.js rendering patterns, performance optimization, lazy loading, code splitting, API integration, and modern frontend architecture. Additionally experienced in Python, FastAPI, and AI-powered applications, bringing full-stack capabilities to frontend development.

Experience

Aieton Labs Private Limited Jul. 2025 – Sep. 2026

- **Death Claims – UI & AI Developer (Mar. 2026 – Sep. 2026)**
- *Tech Stack: React, Next.js, Tailwind CSS, Ant Design, Web Speech API, Python, FastAPI, Pydantic, LangGraph, RAG*
- Built voice-to-text death intimation using the browser Web Speech API, converting the intimating person's speech into text to automatically fill the intimation form, the first step of the claim workflow.
- Developed responsive enterprise interfaces using React and Next.js for claims processing, dashboards, document review, beneficiary management, and multi-stage workflow management.
- Built reusable UI components and workflow-driven interfaces using Tailwind CSS and Ant Design, improving consistency and maintainability across application modules.
- Designed complex form flows, data-driven screens, and reusable components for enterprise insurance workflows.
- Integrated frontend applications with 28+ REST APIs built using FastAPI and Pydantic.
- Implemented responsive layouts and reusable design system components for cross-device compatibility.
- Collaborated with backend and AI teams to integrate document processing, validation, retrieval, and AI capabilities into production-ready web interfaces.
- Developed AI-powered chatbot interfaces enabling claim processors to query uploaded documents and receive evidence-based responses.
- **Expert Solver Platform — Enterprise Loan, Property & Injury Claims – UI Developer (Jul. 2025 – Oct. 2025)**
- *Tech Stack: Next.js, Ant Design, Tailwind CSS, React*
- Developed enterprise modules using Next.js and React for Loan & Property and Injury Claims workflows.
- Built complex forms, document upload and preview modals, task management interfaces, communication logs, and reporting dashboards.
- Created reusable UI components and shared state logic, reducing code redundancy by 95%.
- Implemented responsive layouts and reusable design patterns for consistent enterprise application experiences.
- **OPM Dashboard — Internal Enterprise Operational Dashboard – UI Developer (Jul. 2025 – Oct. 2025)**
- *Tech Stack: React, Vite, Tailwind CSS*
- Built an enterprise dashboard using React with interactive charts, tables, modals, forms, and reusable UI components.
- Improved initial application load time by 40% through Vite optimization, lazy loading, and code splitting.
- Developed responsive interfaces and ensured cross-browser compatibility across application modules.

Innova Solutions – UI Developer Oct. 2022 – Jul. 2025

- **Gas Dashboard — High-Volume Data Enterprise Platform – Frontend Developer (Sep. 2024 – Jul. 2025)**
- *Tech Stack: React 18+, Material UI, AG Grid, Jest, Axios*
- Built scalable React 18+ dashboard handling 100k+ records using AG Grid with advanced sorting and filtering.
- Implemented custom Axios interceptors for improved API error handling and response caching.
- Achieved 92% unit test coverage with Jest and React Testing Library.
- **GATT — Gas Trading Analytics Tool – Frontend Developer (Dec. 2023 – Sep. 2024)**
- *Tech Stack: Angular, Chart.js, Leaflet, TypeScript*
- Built Angular-based gas trading analytics UI with real-time charting and live data feeds.
- Integrated Chart.js and Leaflet for pricing visualization and geo-mapped asset tracking.
- Optimized bundle size using lazy-loaded feature modules and shared Angular services.
- **GSD — Gas Supply & Distribution – Junior Software Engineer (Oct. 2022 – Nov. 2023)**
- *Tech Stack: Angular, TypeScript, NgRx, RxJS, HTML/CSS*
- Built responsive Angular components with TypeScript, HTML/CSS for a gas supply domain application.
- Managed complex form state and reactive data streams using NgRx and RxJS.
- Improved UX by persisting user preferences via LocalStorage.

Indian Servers Sep. 2021 – Dec. 2021

Machine Learning Trainee

- Explored supervised learning, regression pipelines, cost function analysis, and model evaluation metrics.

Education

Narayana Engineering College June 2018 – June 2022
B.Tech in Computer Science and Engineering

Technical Skills

Frontend: React 18+, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, JSX, Web Speech API
UI & Styling: Tailwind CSS, Ant Design, Material UI, Bootstrap
State Management: Redux Toolkit, React Query, Context API, NgRx, RxJS
Rendering & Performance: SSR, CSR, SSG, Lazy Loading, Code Splitting, Memoization, Vite Optimization, Responsive Design, Large Dataset Rendering
API Integration: REST APIs, GraphQL, Axios, Fetch
Testing: Jest, React Testing Library
Backend: Python, FastAPI, Pydantic, .NET, REST APIs, GraphQL, API Integration, Asynchronous Processing
AI & Generative AI: LangGraph, RAG, IDP, Azure OpenAI, Gemini, Semantic Kernel, Kernel Memory, AI Chatbots, LLM Applications, Prompt Engineering
Databases & Tools: PostgreSQL, SQL, Git, GitHub, Azure DevOps, Webpack, Vite, Postman, JIRA, Agile, Scrum
